

WSHFC'S SUSTAINABLE ENERGY TRUST AND SEATTLE CITY LIGHT ARE PARTNERING TO BRING COST EFFECTIVE SOLAR POWER TO AFFORDABLE HOUSING AND QUALIFYING NONPROFIT FACILITIES.

### HOW DO YOU BENEFIT?

1. GO SOLAR

2. MEET SUSTAINABILITY GOALS

3. REDUCE OPERATING EXPENSES

### YOU QUALIFY IF.....

- Seattle City Light is your organization's electricity provider
- You are a nonprofit or public organization whose primary mission serves low income individuals or families
- You are looking to install solar panels or expand an already existing installation
- You have site control or ownership of your building(s)
- You can install at least 30kW of solar

### HOW DOES IT WORK?

The SET will provide a below market rate loan to cover the cost of installing solar

Once your solar is operational, Seattle City Light's Green Up Program will buy down a substantial portion of the loan's principal by prepaying for Renewable Energy Credits

Combining the SET Loan and the Green Up REC Purchase allows your solar to generate revenue immediately
